Services

GJD AeroTech Ltd

A leading provider of line maintenance and technical ground handling services at your next landing airport. We understand the importance of minimal disruptions to flying schedules. Hence, we emphasize quick response time, a strong network and high dispatch reliability.

Our extensive line maintenance network will cover most of the airports you fly to and beyond. Our specialized Quick-Action-Team (QAT) is on standby 24/7. In times of Aircraft-On-Ground (AOG) situations, you can rely on our QAT to provide swift support to your operation.

We also offer Aircraft parking & Storage Maintenance facilities for both on long & short terms at our expansive head office in Bruntingthorpe Airport in Leicestershire with a two mile runway and only an hour's drive from London Heathrow Airport

Our work performed in AOG situations include:

- ✈ Assist on Aircraft Engine change
- ✈ Assist on Aircraft Landing Gear change
- ✈ Assist on Landing Gear Oleo Seal change
- ✈ Cargo loading system rectification
- ✈ Assist on Aircraft Windshield change
- ✈ Assist on Aircraft Hydraulic leak rectification
- ✈ Assist on Aircraft Structural repairs
- ✈ And many other AOG situations at various destinations.

You can be assured of an on-time departure of your aircraft with our extensive operational experience.

Line Maintenance services provided:

Routine Services

- ✈ Technical Ramp Handling
- ✈ oversee potable water, toilet servicing, pushback and towing undertaking

- ✈ Certification and defect rectification
- ✈ Technician support

Non-Routine Services

- ✈ Maintenance of in-flight entertainment systems
- ✈ Cabin repairs and maintenance
- ✈ Aircraft deep carpet cleaning
- ✈ Pest control and cabin disinfection
- ✈ Aircraft washing and polishing
- ✈ Components removal and installation
- ✈ Assistance to customers operating ad-hoc charters

Constantly staying at the leading edge of aircraft technology, our people are distinguished by a continuous strive for excellence and a high adaptability to changes.

Striving for Excellence

In GJD AeroTech Ltd, work doesn't stop at delivery of services. We continuously

- ✈ Improve our processes

- ✈ Improve skill sets of our workforce
- ✈ Increase our capabilities

pushing the boundaries of operational excellence.

Productivity initiative is executed in our operational areas to develop better processes for higher resource optimization. A risk management initiative is in place to prevent hazard occurrences and ensure a safe workplace. Fine-tuning of processes is continually on-going in the organization. We invest strongly in staff training to upgrade skill sets so that we remain at the leading edge of aircraft technology. This broadens our capabilities to handle the latest range of aircraft, engines and components.

Indeed, the spirit of excellence in our people propels the Company forward.

High Adaptability

Despite vast changes in the operating landscape, we have risen above the

challenges to become a leading line maintenance provider.

Our people believe in adapting quickly to the changing environment and see every change and challenge as an opportunity to set us apart and distinguish ourselves. Be it managing a difficult environment, meeting different needs of customers, taking on wider job scopes, we are quick to adapt and rise to the occasion.

Change is constant and our tune is to succeed in it.

We are dedicated to providing on-time departures and meeting every need of our customers.
